INFRASTRUCTURE | POWDER COATING SERVICE

POWDER COATING APPLICATION PROCESS IN ACCORDANCE WITH ASTM D7803 - 12

01

Metals Powder Coating:

Powder coating for metals offers superior durability and it is very resistant to corrosion, cracking, UV rays and most chemicals. It also has a wide variety of specialty effects that are impossible to achieve with other coating processes. We can handle a wide variety of sizes and quantities. Whether your metals profiles are big or small, new or old, fresh or rusty we can help.

02

Polyester Powder Coating, Epoxy Powder Coating, Inorganic Zinc Liquid Painting, Polyurethane Liquid Painting, Epoxy Liquid Painting, Marine Liquid Painting.

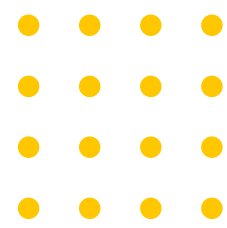

We Powder Coat

1. Steel
2. Galvanized Steel
3. Aluminium
4. Stainless steel
5. Roof Tiles

Quality

Provide services of the highest possible standards, to satisfy our customer needs, expectations of quality, safety, reliability and service.

Objectives

Accomplish quality objectives by establishing, implementing and maintaining a documented effective Quality Assurance System which complies with the requirements of ISO 9001:2015 & ISO 45001:2018

Customer Satisfied

Timely delivery of Services to meet our customer's requirements.

Team work

Ensure our employees are competent and properly trained so they are better able to serve our customers.

Passionate for Excellence Our policy requires our employees to be aware of and contribute to the continual improvements of the Quality Management System.

We offer remarkable 3D design services to the clients from various backgrounds. This has shown us as creative and versatile in our approach, adding to our experience of diverse industries. We balance technology with creativity and offer desirable images to the clients.
